HOW TO ALIGN OTHER CARTRIDGES

With the GIMINI PROGRAMMABLE GAMES SYSTEM, it is necessary to align each cartridge to the master GIMINI control unit. This is NOT peculiar to the ORBIT system but is a standard requirement on all games systems manufactured internationally.

The method to ALIGN the cartridge to the GIMINI Control Unit is by rotating the ALIGNMENT SLOT on the cartridge. On the underside of the cartridge, there is a hole in the case. There will be a small slot (ALIGNMENT SLOT) in a component, which will appear recessed in the case hole. By using a small screw driver (or sharpened knitting needle etc) this slot can now be rotated in either direction. It will only be necessary to align the cartridge once, after purchasing the item and fitting it to your games system.

SUPERSPORT

This cartridge has already been aligned to your master GIMINI controller and will not need further alignment.

BREAKOUT

Select the Breakout Doubles game. Position both the bat controls to the extreme bottom i.e. with the joystick bat controls pulled toward the player. Now adjust the "ALIGNMENT SLOT" on the cartridge until the bats on the TV screen just appear at the base of the game picture.

MOTORCYCLE

No adjustment is required on this cartridge at all. Left bat control vertical movement, controls the motorcycle speed etc.

CAR RACE

Place the left hand bat control to the extreme left. Place the right hand bat control to the extreme right. Now adjust the "ALIGNMENT SLOT" on the cartridge until the two cars just touch the two outside walls - happy motoring. Cartridge features single or doubles operation.

WARFARE

Place both bat controls to the extreme right position. Now adjust the "ALIGNMENT SLOT" until both submarine and destroyer are positioned on the right hand side of the screen. Now position both bat controls to the extreme left position. Adjust the "ALIGNMENT SLOT" in the reverse direction to that above. The very moment the characters (submarine and destroyer) begin to traverse the screen, then the "ALIGNMENT SLOT" is in the correct position ..... and may the best Commander win!
